Ulaş Demir

Frontend Developer ❖ ulasdemir472@gmail.com ❖ İstanbul, Türkiye ❖ Github Linkedin

WORK EXPERIENCE

JOTFORM   **June 2024 – August 2024**
Frontend Developer Intern   *İstanbul, TR*

- As a member of the Jr. Growth Tools team, I developed an analytics dashboard application for social media posts with my colleagues using technologies such as React, Redux, and Redux-Saga. Additionally, I integrated an AI chat feature into the project to assist with analytics.

ELMALI TECH   **October 2023 – April 2024**
Frontend Developer   *İzmir, TR (Remote)*

- I worked in a team that developed high user experience and responsive applications for various companies using technologies such as React, Next.js, and Tailwind. Additionally, I had the opportunity to learn and work with Docker containers.

LOGO SOFTWARE   **July 2023 – September 2023**
Software Developer Intern   *İstanbul, TR*

- Developed an HR project using Java. Collaborated with developers to debug software and coordinated project tasks across departments. Supported development, QA, and UX teams in creating new products. Learned software engineering best practices and assisted with testing client-server network components.

i2i SYSTEMS   **July 2022 – August 2022**
Software Developer Intern   *İstanbul, TR*

- Developed HR and OCS projects using Java and JavaScript(React). Collaborated with developers to debug software and coordinated tasks across departments. Worked with React, Next.js, TypeScript, and Docker. Liaised between marketing and IT on web projects, integrating front-end assets with back-end systems. Learned software engineering best practices and client-server network components. Experienced in HTML, CSS, JavaScript (React, Next, Node) and Tailwind. Contributed to projects in Scrum environments and advised on web service capabilities.

EDUCATION

Karadeniz Technical University
Computer Engineering   **June,2024**

- **GPA:3.2/4.0**

- Here is the YouTube video link for my final project: Mentorify Youtube Link

- In my final project,Mentorify,I worked on the frontend using Next.js.This site facilitates easier communication between mentors and mentees and uses AI to recommend mentors based on the mentee's interests. Additionally, we use WebSocket for real-time chat functionality.
